April 11, 1967

**Simpson, Stratta & Associates
325 Fifth Street
San Francisco, California**

Attention Mr. A. Simpson

Gentlemen:

RE: FAIRCHILD PLATING FACILITY

At the meeting of April 10, 1967 the industrial waste neutralizing system proposed for use was approved for installation with the provisions that the pH of the final effluent will be recorded.

This approval in no way relieves the owner of compliance with City Ordinance 175.633 nor does it imply that the City assumes any degree of responsibility for the adequacy of the process or facilities.

It was also agreed that a cleanout would be installed at the intersection of the two 8-inch storm drains shown on the plans.

Very truly yours,

**ROGER HICDON
Operations Engineer**
